We are Clear Skye, an Identity Access + Management (IAM) software company. Keep reading to learn more about what we do and ways we can work together.
Clear Skye, an Identity Access and Management (IAM) software company, reimagines enterprise identity access and risk management software to make a complicated problem easier to manage.

Built on ServiceNow’s Now Platform, Clear Skye IGA removes the need for a standalone IGA solution in favor of leveraging an existing platform.

ABOUT US

Clear Skye is an identity security software firm headquartered in Emeryville, Calif.

While we have extensive Identity Access Management (IAM), Identity Governance and Administration (IGA), and Now Platform experience, we believe we’re more than our resumes.

Yes, we’re entrepreneurs and IGA experts. We’re also gamers, musicians, and problem solvers who love a burger and a beer from time to time (to time to time).

And we’re here to let businesses know identity management no longer needs to be unnecessarily complex.

Co-founders Vahan Galachyan and TJ Gryziec — who met while working at Morrison & Foerster LLP — created Clear Skye in 2016 to redesign enterprise IAM, IGA, and identity risk management.

After building more than 50 applications on the ServiceNow platform, they envisioned a scalable IGA-as-a-service platform to handle day-to-day identity management routines, such as user onboarding and offboarding, access requests & reviews, and role provisioning.

In 2020, One Identity alum John Milburn and industry veteran Luis P. Almeida joined Clear Skye as CEO and CRO, respectively, and launched the company out of stealth mode.

OUR SOLUTION

Clear Skye reimagines IGA on ServiceNow.

Clear Skye IGA is built upon the ServiceNow Now Platform, which processes 4 billion transactions a month. Our IGA solution provides identity lifecycle management and governance solutions across a broad set of verticals.

The Clear Skye IGA software transforms security teams’ digital environments by finally aligning identity management with critical functions like ITSM, CMBD, GRC, and security operations into a centralized location.

Before, companies relied on weak integrations to allow ServiceNow to perform IGA services.

Native to the Now Platform, Clear Skye removes the need for a standalone IGA solution in favor of leveraging an existing platform. All ServiceNow data, workflow information, and interfaces are readily available in the Clear Skye IGA tool.
“My mouth is watering at the thought of what we could do using this.”

- Identity Governance Expert

OUR MISSION + VALUES

Our mission is to simplify identity security and compliance.

Day to day, we live by the three core values that define our company. These values drive our company culture and how we interact with business partners.

Serve the Customer
We care about our customers. The person deploying the software. The employee preparing for an audit. The Graveyard IT help desk. The new hire. These are some of the people that interact with and benefit from our software. We want to make their work lives better.

Disrupt through Innovation
The IGA space has been asleep for the last decade. We plan on waking it up.

"Good Enough" is not "Great"
For us, mediocrity is the enemy. We invested four years in the product before exiting stealth. Now, we must stick the landing. With all stakeholders in mind and a drive to win, we strive for excellence.

IGA + ServiceNow
Better Together

ServiceNow is the undisputed leader at making work better through process automation. At Clear Skye, we believe Identity Governance is just another process for you to automate. The combination of Clear Skye IGA and ServiceNow enables you to treat Identity Governance like every other business process.
